

Withdrawal and Injection Curves

**Annex 1 to the Flexibility Services Contract(s) TTF
with contract sheet number(s).....**

between

EnergyStock B.V.

and

[TTF Customer]

Introduction

The specifications as mentioned below depend on behaviour and operating of the *Gas Storage Facility*. In order to comply with rules as set forth by the Dutch Mining Authorities, *EnergyStock B.V.* will verify the specifications on a regular basis and adjust them if needed.

The Withdrawal and Injection Curve for *TTF Customer* is based on the *Contracted TTF Flexibility Services* as described in all *Flexibility Services Contracts TTF* of *TTF Customer*. In case the *Contracted Flexibility Services TTF* of *TTF Customer* will change, the withdrawal and injection curve will be adjusted accordingly.

Withdrawal curve

The maximum *Quantity of Gas* to be withdrawn by *TTF Customer* per *Gas Day* out of the *Gas Storage Facility* is dependent on the *Actual Available Working Gas* at the beginning of this *Gas Day*.

The withdrawal curve below is based on the *Contracted Flexibility Services TTF* and will per *Gas Day* depend on the *Actual Available Working Gas* at the beginning of this *Gas Day*.

<Graph to be determined as soon as *Contracted Flexibility Services* are agreed upon>

The beginning and end points of the curves are given below (per *Contracted Send Out Capacity*):

Year	<i>Contracted Working Volume</i>	full cavern	all <i>Working Gas</i> withdrawn
xx	xxx kWh	xxx kWh/day	xxx kWh/day

Injection curve

The maximum *Quantity of Gas* to inject by *TTF Customer* per *Gas Day* into the *Gas Storage Facility* is dependent on the *Actual Available Working Gas* at the beginning of this *Gas Day*. The injection curve below is based on the *Contracted Flexibility Services TTF* and will per *Gas Day* depend on the *Actual Available Working Gas* at the beginning of this *Gas Day*.

<Graph to be determined as soon as Contracted TTF Flexibility Services are agreed upon>

The beginning and end points of the curves are given below (per *Contracted Send in Capacity*):

Year	<i>Contracted Working Volume</i>	full cavern	all <i>Working Gas</i> withdrawn
xx	xxx kWh	xxx kWh/day	xxx kWh/day
