Considerations

Component T1 of the considerations, as described in *Article 3.6 of the General Terms and Conditions Flexibility Services TTF*, is calculated as:

T1 = TTF FST x CSOC x INDEX x Year ratio.

Where:

TTF FST = *TTF Flexibility Services Tariff* (as specified in Table 1), in *Euro per kWh Contracted Send Out Capacity per Hour per Year* (price level xx) and shall be based on the components *Contracted Send Out Capacity, Contracted Send In Capacity and Contracted Working Volume*

CSOC = *Contracted Send Out Capacity in kWh per Hour* (as specified in Table 1).

INDEX = CPI related escalation factor, and

CPI = values of the consumer price index as published by the 'Centraal Bureau voor de Statistiek' series 'Alle huishoudens, afgeleid, with a current basis (reference calendar year) 20xx = 100'.

Year ratio = percentage of the relevant contract year, where contract year is the first year after the *Start Date* and thereafter every consecutive year

The amounts payable so determined shall be rounded to two (2) decimal places.

Annex 1 to the *Flexibility Services Contract(s) TTF* describes the withdrawal and injection curve applicable to *TTF Customer* for these *TTF Flexibility Services Contract(s)* and forms an integral part thereof.

In witness whereof the undersigned have executed this *Flexibility Services Contract TTF* in two originals:

Signed this day of

For and on behalf of *EnergyStock B.V.*
